

Ready
for a
world of
new energy?

Ready for better energy solutions? At EDL we are.

We live in a world that is ever-changing and so is the way we use and produce energy.

At EDL we've been innovating for over 30 years. That's led us to create an energy portfolio of unparalleled diversity. We're poised and ready to deliver better energy solutions for the world today, and tomorrow.

Fuelled by a different kind of energy.

Since the EDL story began, our team have been driven by a unique energy. We think differently. We explore new paths. We're passionate about finding a better way. And now, we're a leading global producer of sustainable distributed energy.

At every point of our journey, our customers have been at the centre. They value our reliability and innovation and we rely on their support and collaboration. It's these customer relationships which have allowed us to create world-first, expectation-exceeding sustainable energy solutions around the globe.

A world of new energy. We're ready.

As a leading global producer of sustainable distributed energy, we are dedicated to a world of new energy for our customers, stakeholders and communities.

Our tailored, innovative services include:

- Producing and selling electricity to direct customers, retailers and mining companies;
- Delivering energy direct to customers;
- Generating and selling environmental credits in international, national and state-based schemes; and
- Project development, finance, design, operation and maintenance of power generating and energy delivery projects globally.

We know there is no one solution to the world's or our customers' energy needs. At EDL, tailored solutions means options.

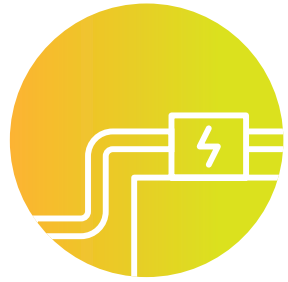

Our team is committed to developing innovative solutions that truly deliver on our customers' expectations of reliable, cost-effective and environmentally sustainable energy. Our extensive global experience allows us to think differently about what that means for each of our customers. Always developing, our energy expertise expands across five key areas.

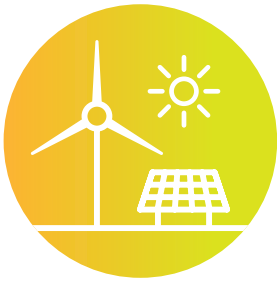

Remote Energy

Landfill Gas

Waste Coal Mine Gas

Renewables

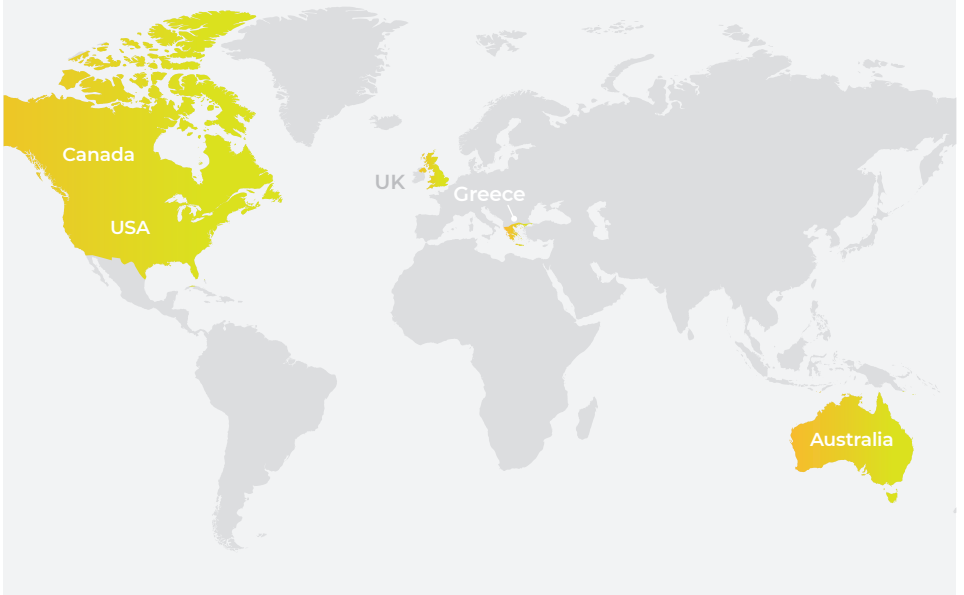

LNG / CNG

At EDL we're global energy players. We understand and are prepared for the complexities associated with a decarbonising energy market.

Our expansive reach means we're playing a key role in the world's transition from traditional energy sources to decarbonised solutions. So no matter where our customers are based, we're here to provide smart, tailored solutions that meet the needs of our evolving world.

Where we operate.

We own and operate a global portfolio of power stations in Australia, North America and Europe.
