

A large circular graphic containing a photograph of a white wind turbine. The turbine's blades are spread out, and the nacelle has the 'eDL' logo on it. The background of the photo shows a landscape at sunset or sunrise. The circular graphic is framed by a decorative border of black and white diagonal lines.

**Welcome
to a
world of
new energy**

Company profile

More than 1GW
installed capacity

5,350GWh generated
per annum

As a leading global producer of sustainable distributed energy, we are dedicated to a world of new energy for our customers, stakeholders and communities

Our values

Wherever we are working in the world, EDL people live and breathe the following SPIRIT values. As we strive to achieve our vision, these values are paramount.

Safety, health
& environment

Performance

Innovation &
initiative

Respect &
responsibility

Integrity

Teamwork

Safety is EDL's number one priority

It is our fundamental belief that all our people have the right to go home safe and well to their families every day. Our aim is ZERO HARM.

We train and support our teams to put their safety and the safety of those around them first. Across EDL, we work closely with our customers, suppliers and stakeholders to achieve continuous improvement in our safety culture, processes and behaviours.

Leaders in greenhouse gas abatement

EDL is playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

715,780

homes powered per annum

20.1 million

tonnes CO₂-e abated and
avoided per annum

Equivalent of approx.
5.5 million

cars removed from
the road per annum

*Based on CY2019 performance

Our customers are at the centre of everything we do

At EDL, we are committed to developing innovative, tailored solutions that deliver on our customers' expectations of reliable, cost-effective and environmentally sustainable energy. Following are some of our customers.

GOLD FIELDS

A GLENORE COMPANY

We live in a world that is ever-changing and so is the way we use and produce energy

At EDL, we've been innovating for more than 30 years. That's led us to create an energy portfolio of unparalleled diversity.

Our team is committed to developing innovative solutions that truly deliver on our customers' expectations of reliable, cost-effective and environmentally sustainable energy. Our energy expertise expands across six key areas.

Landfill gas

Renewables & hybrids

LNG/CNG

Remote energy

Waste coal mine gas

Renewable natural gas

Our projects

World leading remote energy and hybrids

McArthur River Mine Power Station

77MW, Northern Territory

Agnew Hybrid Renewable Project

56MW, WA

Coober Pedy Hybrid Renewable Project

9MW, South Australia

Growing portfolio of renewables

Wonthaggi Wind Farm

12MW, Victoria

Cullerin Range Wind Farm

30MW, New South Wales

Weipa Solar Farm

2MW, Queensland

Agnew Hybrid Renewable Project

EDL is currently delivering this ground-breaking project in partnership with Gold Fields, with support from ARENA. In an Australian first, the project will utilise wind generation as part of a large hybrid microgrid in the mining sector. Once completed, this globally significant project will provide the mine with >50% renewable energy over the long term, without compromising power quality or reliability.

Stage 1	Stage 2	
21MW power station incl. 18MW gas and 3MW diesel	5 wind turbines	13MW battery
4MW PV solar	18MW wind generation	2020 completion

Coober Pedy Hybrid Renewable Project

Supported by the Australian Renewable Energy Agency (ARENA), this project combines 4MW wind and 1MW solar generation, a 1MW/500kWhr battery and other integration technologies with the diesel power station as a backup. This project has delivered lower cost and more stable electricity for Coober Pedy at world-leading renewable energy penetration rates.

Project outcomes		
99.995% reliability in FY18	99.999% reliability in FY19 to date	73% average renewable energy contribution
8GWh per annum of renewable electricity	>2,100,000 litres per annum reduction in diesel consumption	97 hours longest uninterrupted period at 100% renewable supply (Dec 2019)

Cannington Power Station

Initially commissioned as a diesel power station for South32's Cannington mine, the facility was upgraded to a primarily gas-fired power station in 1999. In 2018, EDL commenced supplying electricity from a 3MW solar farm integrated with the existing power station.

At a glance		
35MW gas capacity	5MW diesel capacity	3MW solar generation
