

Title: Regional Operations Support Specialist
Location: Narvon, Pennsylvania, United States
Function: Operations
Details: Full Time, Permanent

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the ROS Leading Hand, the Regional Operations Support Specialist assists with the maintenance, safety/compliance, and improvement activities of the plant. The specialist will also provide support through the coordination, planning and implementation of special project initiatives. This role requires travel to out-of-state locations as needed.

Key Responsibilities

- Working and communicating cooperatively in a team environment such that all facilities within the assigned region can benefit from the successes, failures and lessons learned company-wide.
- Assisting the Operations Technicians at all facilities within the assigned region with preventive maintenance, emergency maintenance, safety/compliance and physical plant improvement activities.
- Working with the Operations and Maintenance Manager to schedule, plan, implement and perform quality control of top end overhauls of engine-generators within the assigned region.
- Assisting with the development and drafting of standard operating procedures (SOPs) and best management practices (BMPs).
- Acting as regular liaison with Operations Technicians at all facilities within the assigned region to facilitate continuous education and certification consistent with SOPs and BMPs.
- Training new and existing Operations Technicians on SOPs and BMPs.
- Responding quickly to assigned plants.

Qualifications and Experience

- High School Diploma.
- Two-year post high school graduation technical degree in mechanical and/or electrical engineering technologies or comparable experience.
- Strong knowledge of landfill gas-fuelled engine-generator operations, mechanical and electrical systems and maintenance/troubleshooting.
- Ability to identify, quantify, plan and implement opportunities that create value EDL.
- Solid written and verbal communication skills, including the ability to write routine reports, SOP drafts and correspondence and share information with co-workers.
- Good math skills, including the ability to compute rate, ratio and percent; to interpret graphs; and to calculate figures and amounts such as proportions, percentages, area and volume.
- Ability to solve practical problems and interpret a variety of instructions furnished in written, oral, diagram or schedule form.
- Spreadsheet, word processing and Internet skills.
- Ability to use current and any future preventive maintenance and inventory tracking computer software.
- Self-motivated with the ability to reprioritize activities based on unplanned operations support for Operations Technicians.
- Good working knowledge of methods, materials, tools and techniques used in the repair of engines.
- Good skills in operating vehicles.
- Must have a valid State Driver's License and the capability acquire a Michigan Commercial Driver's License "Class A" within 1 year.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
