

Quality Management System Policy (Australian ISO: 9001:2015 sites)

EDL's vision is to be the leading global producer of sustainable distributed energy and we are committed to exceeding our customers' expectations and to continuous improvement.

These are underpinned by our commitment to maintain an ISO 9001:2015-certified Quality Management System ('QMS').

Under this Quality Management System Policy:

- EDL has established, maintains and reviews procedures and practices, as required to meet the requirements of an ISO 9001:2015-certified QMS
- EDL maintains a QMS that meets the requirements of ISO 9001:2015
- EDL complies with applicable legal and other business obligations for the activities we perform
- EDL continually monitors and improves our management systems
- EDL works closely with our customers to ensure we understand and meet their needs, with the aim of enhancing customer satisfaction
- EDL systems and controls are designed to understand, meet or exceed customer requirements through consistent and effective provision of services
- EDL employees are encouraged and empowered to participate in quality improvement activities through teamwork and consultation.

This Quality Management System Policy applies to EDL's Australian sites as outlined in the ISO9001:2015 scope of certification.

All EDL employees have individual responsibility for understanding and applying this Quality Management Policy in the performance of their tasks.

The Quality Management System Policy and overall QMS are reviewed periodically by the Executive Leadership Team to ensure they comply with the requirements of ISO 9001:2015.
