

**Title:** RNG Plant Technician  
**Location:** Wood Road, Michigan, United States  
**Function:** North American Operations  
**FLSA Status:** Non-Exempt  
**Details:** Full-Time, Permanent

---

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the RNG Operations Supervisor, the RNG Plant Technician is responsible for supporting procurement, managing on site inventory, and providing mechanical support for the RNG Plant within EDL's North American operations. They will work with the RNG Operations Supervisor and Plant Team to be the lead person to schedule, procure materials, and arrange support staff to maintain RNG plant operations. The RNG Plant Technician is responsible for achieving operational metrics, as related to plant maintenance and production goals.

### **Key Responsibilities**

- RNG asset maintenance management, planning and scheduling both internal and external support personnel for the RNG plant.
- Work closely with the RNG Operations Team and RNG Plant Team to ensure continuity of support and successful maintenance related outcomes.
- Ensure the RNG Plant is being maintained to meet production and the asset maintenance plans.
- Manage planning, communications with RNG Plant Team and support labour for maintenance outages.
- Planning, coordination, and scheduling of major plant maintenance outages
- Be knowledgeable of mechanical preventive maintenance schedules, electrical GEAMS and maintenance schedules in support of RNG Plant compliance.
- Maintenance resource planning to effectively support start-up and operations of the RNG plant.
- Identification of critical inventory and spares and support strategy for procuring and maintaining on site inventory.
- Analyse operations and maintenance data to make recommendations for improving productivity and efficiency in operations.
- Support Operations by ensuring that the RNG plant is running at full potential while minimizing direct costs.
- Arrange for outside third-party assistance when required and manage and oversee any third-party contractors working onsite.

### **Qualifications and Experience**

- Prior lead maintenance experience in an industrial or manufacturing environment, preferably with electrical and rotational equipment
- Experience with setting and adhering to budgets and understanding of basic accounting principles.
- Experience with setting site maintenance schedules, preferably with both gas field, gas plant and production equipment

- Experience adhering to Health and safety responsibilities and requirements.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
