

**Title:** Operator  
**Location:** Coopersville, Michigan  
**Function:** North American Operations  
**Details:** Full Time, Hourly

---

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Region Supervisor, the Operator will be responsible for operation and Maintenance of gas fuelled power plant, consisting of multiple spark ignition reciprocating engines as well as all associated auxiliary equipment.

### **Key Responsibilities**

- Comply with all workplace, federal, state and OSHA safety guidelines and obligations;
- Perform regular inspections and maintenance of fixed plant equipment, including engines, generators and other auxiliary equipment such as pumps, chillers, valves etc.
- Perform regular inspections and maintenance of gas processing equipment, including compressors, aftercoolers, filtration vessels, dehydration skids, and the associated controls, gages and valves that support their operation;
- Administrative duties including documenting and reporting equipment maintenance, operation and condition;
- Perform fault-finding, repairs and reporting of electrical and mechanical systems;
- Operation of advanced instrumentation and process control systems;
- Available for on-call duties remaining within 45 minutes of the power station during these hours.
- Manage plant inventory process which includes, parts keeping, ordering and goods receiving of parts.
- Flexibility to work and support at other power plants in the region portfolio.
- Carry out routine housekeeping duties.
- Other duties as assigned by supervisor or manager.

### **Qualifications and Experience**

- Current driver's license with no outstanding violations or issues.
- Experience with Gas and or Diesel reciprocating engines
- Experience with Caterpillar reciprocating engines;
- Experience with LFG Power Generation Systems, but not required.
- Ability to work weekends, holidays and on-call hours due to job requirements.
- Maintenance, mechanical or electrical experience and/or suitable background;
- Basic computer operation including the use of Microsoft Word and Excel
- Ability to collect and interpret data and write clear, accurate reports and specifications
- Effective communication skills both verbal and written
- Ability to perform minor repairs and overhaul mechanical & electrical equipment.
- Ability to work autonomously and self-motivate in a multi-skilled work environment.
- Ability to cooperate and effectively communicate with co-workers and contractors, sometimes during high stress situations;
- Proficient in using computers, instrumentation, metering and/or monitoring equipment to measure, record and make adjustments within operating parameters;
- Basic mechanical skills with the ability to fault find and carry out preventive maintenance on mechanical equipment, including engines, compressors, pumps and valves.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
