

**Title:** Performance Analyst  
**Location:** Brisbane, Australia  
**Function:** Global Reporting & Analytics  
**Details:** Full Time, permanent

---

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Asset Analytics Manager, this role is responsible for the analysis and reporting of historical data and predicted trends to drive appropriate action, consistent performance and incremental improvement.

**The key responsibilities for this position include but are not limited to**

- Assist in implementing real-time calculations for new KPIs and global standards.
- Analyse KPI performance shortfalls to determine root causes and opportunities for operational performance improvements.
- Analyse relative asset performance (portfolio, site, unit) and industry benchmarking to identify opportunities for incremental performance gains.
- Develop predictive models and look for non-obvious relationships which effect performance.
- Review and validate key operational data and ensure accurate reporting of key metrics to sufficient levels of accuracy.
- Test, validate and communicate the results of improvement initiatives and maintenance spend.
- Support management requests for statistical analysis.
- Quickly learn commercial aspects of the business.
- Run and distribute strategic performance reports on behalf of the Global Reporting and Analytics Team.
- Develop, automate and roll-out reports to Operations and other business areas in accordance with agreed responsibilities and service levels.
- Provide ad hoc support to the wider business on reporting / data issues and ad hoc data requests.
- Support and comply with all company safety policies and operational procedures.
- Actively ensure personal health and safety and the safety of others.
- Abide by and promote EDL core values.

**Person Specific**

- Analytical, continuous improvement approach.
- Proven ability to problem-solve.
- Ability to work with large amounts of data and troubleshoot / fault find.
- Advanced ability with Microsoft Excel and experience with other Microsoft Office products.
- Experience with database applications preferred.
- Experience with Data Intelligence software preferred, e.g. Power BI, Tableau etc.
- Excellent verbal communication skills.
- Ability to work with multi-disciplined teams across global locations.
- Ability to work autonomously with no supervision

**Qualifications and experience**

- Degree in numerate discipline, ideally engineering and/or data science.
- Experience in power or similar industry (heavy or resource sector) preferred.
- Experience in reporting or analytics preferred.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
