

**Title:** Continuous Improvement Lead  
**Location:** Brisbane, Australia  
**Function:** Engineering  
**Details:** Full Time, Permanent

---

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Group Engineering Manager, this role is responsible for managing the assessment, approval, and delivery of small-scale optimisation projects across multiple sites and business units.

**Key responsibilities for this position include but are not limited to**

- Overall continuous improvement and optimisation projects delivery portfolio owner, accountable for delivery to meet business objectives and responsive to Operational ideas and requirements;
- Provides leadership, guidance, and support to team of Project Engineers
- Coordinate with Site Operations, Engineering, Commercial, Data Analytics and key decision makers to facilitate an efficient flow of information, value assessment and drive generation of opportunities;
- Lead the screening, prioritisation, scoping and business case development of multiple optimisation, change management, SIB capital and risk reduction opportunities;
- Develop, implement, govern, and continuously improve an appropriate project management delivery system to manage simultaneous projects;
- Governance of project risk management, Project Execution Plans for Project Objectives across portfolio of improvement projects;
- Support the commercial aspects of the projects including negotiations with suppliers and contractors;
- Ensure all projects follow statutory and legislative requirements;

**Qualifications and experience**

- Engineering or Project Management qualifications;
- Solid Project Management background desirable;
- Experience with heavy industry (e.g., mining, power generation, oil & gas) would be an advantage;
- Familiarity with corporate finance principles and project evaluation techniques desirable;
- Prior experience with cost benefit analysis, options analysis, and the development of business cases.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
