

Title: Operator
Location: Mauk, Georgia, United States
Function: Operations
Details: Hourly, Full-time

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Regional Supervisor, the Operator will be responsible for maintaining safety guidelines in accordance with workplace, state, federal and OSHA standards. In addition, this individual will be performing inspections and maintenance of equipment found on site.

Key Responsibilities

- Operation and Maintenance of gas fuelled power plant, consisting of multiple spark ignition reciprocating engines as well as all associated auxiliary equipment;
- Comply with all workplace, federal, state and OSHA safety guidelines and obligations;
- Perform regular inspections and maintenance of fixed plant equipment, including engines, generators and other auxiliary equipment such as pumps, chillers, valves etc.
- Perform regular inspections and maintenance of gas processing equipment, including compressors, aftercoolers, filtration vessels, dehydration skids, and the associated controls, gages and valves that support their operation;
- Administrative duties including documenting and reporting equipment maintenance, operation and condition;
- Perform fault-finding, repairs and reporting of electrical and mechanical systems;
- Operation of advanced instrumentation and process control systems;
- Available for on-call duties remaining within 45 minutes of the power station during these hours;
- Carry out routine housekeeping duties;
- Other duties as assigned by supervisor or manager.

Qualifications and Experience

- Current driver's license with a clean driving record;
- Ability to work weekends, holidays and on-call hours;
- Maintenance, mechanical or electrical experience and/or suitable background;
- Microsoft Word and Excel and a Computerized Maintenance Management System ("CMMS")
- Ability to collect and interpret data and write clear, accurate reports and specifications
- Effective communication skills both verbal and written
- Experience with Gas and/ or Diesel reciprocating engines, preferably Jenbacher
- Experience with LFG Power Generation Systems and extraction systems preferred;
- Analytical and trouble shooting skills in either mechanical and electrical systems;
- Ability to perform minor repairs and overhaul mechanical and electrical equipment;
- Familiarity with the operation of instrumentation and process control equipment and systems;
- Ability to work autonomously and self-motivate in a multi-skilled work environment;
- Ability to cooperate and effectively communicate with co-workers and contractors, sometime during high stress situations;

- Proficient in using computers, instrumentation, metering and/or monitoring equipment to measure, records and make adjustments within operating parameters;
- Basic electrical skills with the ability to fault find and carry out preventive maintenance on electrical equipment; such as PLC's, Generators, High Voltage and/or Control systems.
- Basic mechanical skills with the ability to fault find and carry out preventive maintenance on mechanical equipment; including engines, compressors, pumps and valves.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
