

Title: Control Panel Operator
Location: Brisbane, Australia
Function: Global Control Centre
Details: Full Time, Permanent

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Global Control Centre Manager, the Control Panel Operator will be responsible for supporting the safe, reliable and cost-efficient operation of the company's assets in collaboration with site-based operator maintainers.

Key Responsibilities

- Proactively monitor power station equipment to enhance the performance of generating assets.
- Monitor the NEM data and respond accordingly to maximise revenue and/or minimise costs.
- Liaise with site-based personnel to support day to day operation.
- Provide safety oversight of remote operations and lone workers by monitoring IVMS and Blackline, and escalating any alerts to ensure safety of personnel.
- Liaise with office staff to provide information on power station status and report any problems.
- Operate equipment in line with established protocols to prevent or minimise power interruptions.
- Understand priority of equipment and restore loss of generation in a safe and timely manner.
- Communicate with key stakeholders via incident reports and daily logs.
- Conduct switching requirements as per switching programs for internal and external customers.
- Actively support all company safety policies and operational procedures to ensure personal health and safety and the safety of others.
- Abide by and promote EDL core "SPIRIT" values.

Person Specification

- Ability to operate plant via remote computer (i.e. SCADA) operations
- Ability to prioritise and function under pressure with competing demands
- Troubleshooting and fault-finding skills through the use of trending and analytical approach
- Ability to work as part of a multi-skilled work team
- Excellent verbal communication skills
- Demonstrated ability to work unsupervised
- Must be able to work as part of a shift in a roster that will involve periods of nightshift, and have flexibility to cover leave and absences

Qualifications and Experience

- Power Plant Operator or equivalent in similar industry (heavy or resource sector)
- Power or heavy industry background in process, mechanical or electrical trades
- At least intermediate ability with Microsoft Office software, in particular Word and Excel

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
