

Title: Mechanical Utilityperson
Location: New South Wales, Australia
Function: Technical Services
Details: Full Time, Permanent

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the NMF Supervisor, this role will be responsible for maintenance works throughout the country on Caterpillar gas and diesel engines located at various sites around Australia.

Key responsibilities

- Travelling around to our Australia sites for breakdown activities!
- Work on Caterpillar engines
- Testing, repairing and preparing engines
- Mentor our apprentices
- Contribute to our outstanding safety culture

Person specification

- Demonstrates initiative, enthusiasm and is a self-starter;
- Open to new ideas;
- Dedicated and committed;
- Team orientated;
- Focussed with the ability to be effective under pressure
- Good written and oral communication skills

Qualifications and experience

- Trade certificate in a Fitting/Plant Mechanical trade essential
- Experience in diesel/gas engine repair/reconditioning highly desirable
- Experience in Caterpillar, Deutz, Jenbacher or any large capacity engines highly desirable

Successful applicants will be required to undergo medical and background screening prior to commencement with EDL.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.

To apply for this position, please send a 1-page cover letter and your current resume to hvacancies@edlenergy.com quoting reference number VAC0326.

Applications open until position is filled
