

Title: Plant Manager
Location: Lowellville, Ohio, United States
Function: NA Operations
Details: Permanent

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

The RNG Plant Manager has responsibility to manage the RNG (Renewable Natural Gas) project and its employees. They will be the lead person onsite providing both technical and operational direction to the plant personnel as well as interacting with the host landfill, regulatory agencies, and customers. The Plant Manager will be responsible for achieving plant operational metrics.

Key Responsibilities

- Manage the RNG plant
- Confirm that all plant data tracking and log requirements are completed in a timely manner.
- Prepare and submit monthly operational reports.
- Ensure that the site is running within Health and Safety regulations and in compliance with all permits.
- Execute all EDL safety training and ensure that all safety processes are adhered to.
- Work with the landfill operations to maximize gas collection and comply with regulatory standards.
- Develop communication protocols with the landfill.
- Direct site meetings as required (operations and safety meetings)
- Ensure that the RNG plant is running at full potential while minimizing direct costs.
- Assist in developing and managing to budget.
- Lead the implementation of safety and emergency procedures associated with the site.
- Operate gas processing equipment and all associated auxiliary equipment.
- Operate instrumentation and process control systems.
- Interface with EDL global control centre for monitoring
- Perform regular inspection and maintenance of fixed plant, compressors, media vessels and associated equipment.
- Oversee electrical and mechanical fault-finding, repairs, and reporting.
- Ensure good maintenance and housekeeping practices are adhered to.
- Schedule daily activities, delegate work tasks to team members and supervise the completion and quality of the tasks.
- Arrange for outside third-party assistance when required and manage and oversee any third-party contractors working onsite.
- Lead communication with landfill partners
- Other duties as assigned from time to time by the Company.

Qualifications and Experience

- Technical degree or 5+ years of relevant experience
- Prior supervisory/management experience in a manufacturing environment, preferably with industrial gases
- Experience with setting and adhering to site budgets

- Experience with setting site maintenance schedules
- Experience with scheduling site staff
- Experience adhering to health and safety responsibilities and requirements.
- Experience with environmental and site compliance regulations

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
