

**Title:** Environment Compliance Engineer / Specialist  
**Location:** Various, United States  
**Function:** NA Compliance  
**Details:** Full Time, Salaried  
**Date posted:** 09/16/2022

---

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Senior Environmental Manager, the Environment Compliance Engineer / Specialist will be responsible for partnering with the business to achieve company objectives by leading and facilitating the development, delivery, implementation, measurement, and maintenance of EDL's NA environmental compliance programs and systems with an emphasis on multimedia areas of the program. Success will be dependent on the ability to engage at the site level and drive the environmental compliance culture and performance within the organisation.

### **Key Responsibilities**

- Work in conjunction with the Project Delivery and Operations to develop and implement plans/schedules related to environmental permitting, compliance, and testing to ensure environmental aspects of EDL's NA operations are supported.
- Waste and chemical program development and permitting/reporting (primary).
- Tank/SPCC program development, implementation, and management (primary).
- Develop and manage waste management program for each facility (primary).
- Perform waste evaluations and ensure proper waste categorization and disposal (primary).
- Monitor and implement compliance related meetings and monitor action items to ensure they are followed up and closed out, as required.
- Compliance Database tracking/management.
- Carry out audits, compliance inspections, compliance observations as required, and support timely close out of actions.
- Assist with pipeline compliance program development, implementation, and management.
- Emissions testing preparation, scheduling, and contract management (support).
- Landfill gas sampling coordination and oversight for compliance monitoring.
- Air permit development and modifications/ RNG facility permitting (support).
- Prepare/review waste/chemical/tank compliance reports (primary) and air reports (support).
- Facilitate compliance report submittals.
- Environmental consultant liaison.
- Local, state, and federal regulatory contact liaison (support).
- Notice of Violation management (primary).
- Monitor and review company training matrices and conduct environmental compliance or permit training where and when required.
- Ensure employee compliance recommendations are evaluated and implemented, if viable.
- Take appropriate action to correct unsafe and non-compliant work conditions and behaviours.
- Provide leadership, coaching and/or mentoring to other teams within EDL.
- Support and comply with Company policies and procedures, as advised and documented in the Company's most recent employment policies.

- Assist in the preparation, maintenance, and practice of facility environmental binders.
- Promote the reporting of all environmental incidents and assist in identification of remedial action including the appropriate accountability in alignment with EDL's Consequence Standard. Take ownership of timely close out actions with Management.
- Collect, distribute, and review of compliance data.
- Review or compile compliance data for compliance reports, typically monthly.
- Any other duties appropriate to the level and responsibility of the position, as required.

### **Qualifications and Experience**

- Typically requires a bachelors' and masters' degree, at least 6 years of experience in compliance, preferably with multi-site organisations in the Construction, Mining, Power Generation or Utility industry.
- Strong understanding of current environmental legislation and associated standards, codes, and practices.
- Knowledge & understanding of environmental issues is critical. Deep understanding of waste, chemical, tank, and SPCC regulatory requirements desired.
- Experience leading program evaluation and development and compliance initiatives with little oversight.
- Experience managing industrial hazards, SDS systems, and compliance file management.
- Experience in auditing compliance programs.
- Self-servicing in the use of IT with proficiency in Microsoft Office products. Attention to detail and the ability to compile clear, concise, and professional documents and reports.
- Willingness to undertake training and achieve qualifications to ensure compliance and regulatory requirements at the discretion and expense of EDL.
- Current drivers licence essential.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
