

Title: Operations Technical Lead (12-Month Contract)
Location: German Creek, Queensland, Australia
Function: CE Operations
Details: 5 days on / 2 days off roster

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Operations Manager Waste Coal Mine Gas Queensland, the Operations Technical Lead will be responsible supporting a program of capital works delivery.

Key Responsibilities

- Interface with customers and suppliers to manage relationships in accordance with EDL's SPIRIT values;
- Engage, manage and supervise contractors as required to deliver capital works;
- Develop and communicate capital works plans as required;
- Manage change in accordance with EDL process and in consultation with Engineering and Asset Management;
- Develop and implement project planning and cost tracking to deliver works within budget and risk;
- Maintain program budgets and submissions;
- Plan shutdowns in concert with power station supervisors; and
- Travel to other sites as required by program delivery.

Person Specification

- A sound understanding of HSE requirements;
- Previous supervisory experience and/or supervisory/management style training is essential;
- Experience in the maintenance of large reciprocating engines;
- Experience in the management and delivery of projects; and
- Experience with SCADA control systems will be an advantage.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
