

Title: Project Director – Australian Projects
Location: Brisbane or Perth, Australia
Function: Project Delivery
Details: Permanent, Full-Time

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Chief Operating Officer, the Project Director – Australian Projects will be responsible for prioritising, managing, and coordinating Project Managers and support teams to develop and safely deliver a range of projects across the Australian Clean Energy and Remote Energy businesses.

Key Responsibilities

- Full accountability for the management of programs consisting of multiple subordinate projects in a role that is dedicated to project delivery including sign off on assumptions of financial models for new and existing projects
- Lead Steering Committees at the ELT level for all projects including reporting of safety metrics, project red flags, variations or identified potential risks
- Develop higher level program management plans to guide / direct your subordinate Project Managers
- Be actively involved and support the development of commercial build-up of new technologies for new business opportunities
- Work closely with the technical and shared services group to foster strong working relationships, while managing the development of technical, safety and environmental scoping documents required for tendering and pricing purposes
- Resource allocation management to ensure project development is cohesive and seamless contributing to positive deliverable project outcomes
- Engage with external consultants and suppliers including OEM's, EPC contractors and technology advisors
- Contract management of construction contracts, negotiation of variations and dispute resolution including technical, safety and commercial levers.

Qualifications and Experience

- An infrastructure professional with a minimum of 15+ years' experience, with Project Director skills dedicated to the delivery of large investment programs ranging from \$20mill - \$300mill.
- Sector experience will be favourable from renewables, power generation, emissions control, heat exchangers and steam circuits.
- Experienced in communicating with executive level clients and management of multi-discipline teams.
- A tertiary qualified Engineer, preferably mechanical, electrical or process. Post qualifications MBA is favourable.
- Strong commercial drive with the ability to drive teams to positive outcomes for clients.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
