

Title: Project Manager
Location: Brisbane, Australia
Function: Project Delivery
Details: Permanent, Full-Time

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Reporting to the Group Project Delivery Manager, this role is responsible for planning, coordinating, and controlling the design, procurement, construction, and commissioning of EDL optimisation and other projects and future Power Station Expansion or New Build Projects and to ensure completion is within the time, cost, and quality constraints to achieve business and project objectives.

Key Responsibilities

- Provide leadership and direction to the application of resources to fulfill project contractual commitments and to successfully deliver the project with the budgetary constraints.
- Coordinate and manage the deliverables of design, procurement, construction and commissioning for the various projects under their control.
- Control and co-ordinate communications with the customer and the customer's representatives to ensure that the project is completed within the agreed scope.
- Assist in the development and implementation of appropriate project systems.
- Control directly through subordinates' project programming, cost control, time control, quality control, major procurement & contract administration, and indirectly oversee design, construction & commissioning activities during the implementation phase.
- Monitor the interaction of various disciplines and call on specialist knowledge when required.
- Manage the commercial aspects of the project including leading negotiations in the implementation phase.
- Ensure that both the companies' and specific project Environmental, Health and Safety obligations relating to project activities are fulfilled.
- Prepare all reports detailing project progress and commercial status.
- Ensure the project is in compliance with statutory and legislative requirements.
- Apply project governance requirements.
- Present reports defining project performance and progress
- Respond to customer queries to maintain a good working relationship between the customer and the EDL Group
- Provide transparent reporting of project costs and schedules to EDL management team.
- Effectively manage high level project progress and any technical and commercial clarifications between major contractors, the EDL Group and the client.
- Provide supervision and leadership to direct reports
- Manages the execution of all project risk reviews
- Ensure a Safe Workplace for Staff and Customers by the preparation & implementation of project HSE Management Plans
- In addition to the duties set out above, you may be expected to perform other duties as assigned from time to time by the Company

Qualifications and Experience

- Engineering Degree Required

- Qualifications in Project Management advantageous
- Approximately 10 years of working experience
- Experience within the power generation industry, specifically design and construction of power stations
- Solid general engineering background in the design of power stations, from mechanical and electrical perspective.
- Ability to delegate, lead, and supervise
- Analytical skills
- Excellent verbal & written communication skills
- Knowledge of statutory requirements relating to the industry.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
