

**Title:** Operator  
**Location:** Georgetown, Ohio, United States  
**Function:** NA Operations  
**Details:** Permanent, Part-Time  
**Date posted:** 12/09/2022

---

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

### **Key Responsibilities**

- Operation and Maintenance of gas-fuelled power plant, consisting of multiple spark ignition reciprocating engines as well as all associated auxiliary equipment
- Comply with all workplace, federal, state and OSHA safety guidelines and obligations
- Perform regular inspections and maintenance of fixed plant equipment, including engines, generators and other auxiliary equipment such as pumps, chillers, valves etc.
- Perform regular inspections and maintenance of gas processing equipment, including compressors, aftercoolers, filtration vessels, dehydration skids, and the associated controls, gages and valves that support their operation
- Administrative duties including documenting and reporting equipment maintenance, operation and condition
- Perform fault-finding, repairs and reporting of electrical and mechanical systems
- Operation of advanced instrumentation and process control systems
- Available for on-call duties remaining within 45 minutes of the power station during these hours
- Carry out routine housekeeping duties
- Other duties as assigned by supervisor or manager.

### **Qualifications and Experience**

- Current driver's license with a clean driving record
- Ability to work weekends, holidays and on-call hours
- Maintenance, mechanical or electrical experience and/or suitable background
- Basic computer operation including the use of Microsoft Word and Excel
- Ability to collect and interpret data and write clear, accurate reports and specifications
- Effective communication skills both verbal and written
- Experience with Gas and or Diesel reciprocating engines
- Experience with Caterpillar reciprocating engines
- Experience with LFG Power Generation Systems
- Experience with LFG extraction and use systems and equipment
- Analytical and trouble shooting skills in either mechanical and electrical systems
- Ability to perform minor repairs and overhaul mechanical & electrical equipment
- Familiarity with the operation of instrumentation and process control equipment and systems
- Ability to work autonomously and self-motivate in a multi-skilled work environment
- Ability to cooperate and effectively communicate with co-workers and contractors, sometimes during high stress situations
- Proficient in using computers, instrumentation, metering and/or monitoring equipment to measure, record and make adjustments within operating parameters

- Basic electrical skills with the ability to fault find and carry out preventive maintenance on electrical equipment; such as PLC's, Generators, High Voltage and or Control systems
- Basic mechanical skills with the ability to fault find and carry out preventive maintenance on mechanical equipment; including engines, compressors, pumps and valves.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
