

Title: Operations Supervisor QLD WCMG
Location: QLD WCMG
Function: CE Operations
Details: Permanent, Full-Time

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

Working closely with the Operations Manager, this position is responsible for ensuring efficient operations of Waste Coal Mine Gas power stations. This role will work in a hands-on capacity supervising a small, multi-skilled team responsible for the operation and maintenance of the German Creek and Oak Creek power stations. This role is a Monday to Friday day shift on site in Middlemount and will require the successful candidate to maintain residency in the local area. The successful candidate will be provided with accommodation in Middlemount and a company vehicle as part of the overall package.

Key Areas of Responsibility:

- Drive safety leadership and promote Health & Safety through setting clear expectations for measurable safety behaviours.
- Actively ensure own health and safety and the health and safety of others through understanding and implementing workplace health and safety obligations, policies and procedures.
- Maintain a culture of reporting and continuous improvement of risk management tools used on site.
- Demonstrate visible safety leadership by conducting safety verifications on-site, facilitating safety conversations and sharing safety learnings from customers and contractors.
- Lead and motivate a team of multi-skilled Operator/Maintainers involved in all aspects of maintaining the power stations.
- Organise and maintain training and associated records of all site personnel.
- Manage professional development of team members through PDRs, learning and development plans and performance improvement plans.
- Implement the WCMG customer management plan to exceed customer expectations.
- Maintain operational compliance with approvals, legislation and contracts.
- Deliver budgeted production targets and develop production plans.
- Manage downtime and maintenance in line with station asset management strategies.
- Manage critical and statutory maintenance in line with company policies and procedures.
- Develop and manage site budgets for operating costs (direct & indirect) and capital costs.

Qualifications and Experience:

- Mechanical or Electrical trade (preferred) or relevant degree qualifications
- Sound understanding of health and safety, environmental and industrial relations requirements.
- Previous supervisory experience.

Person specific:

- Proven time management, prioritisation and organisational skills.
- Demonstrated ability to lead a team and promote good workplace culture.
- Effective communication skills, both written and oral.
- Shows initiative and resilience and is motivated and committed to achieving outcomes.

Experience in the following will also be an advantage:

- Experience within the gas industry or power generation industry.
- Experience with financial planning, budgeting and accounting functions.
- Experience managing and delivering projects.
- Experience with data and analytics.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
