

Title: Senior Environmental Advisor
Location: Brisbane, QLD
Function: HSE
Details: Full Time Permanent

EDL owns and operates a global portfolio of power stations in Australia, North America and Europe. Our vision is to be the leading global producer of sustainable distributed energy. At EDL, we are playing a key role in the world's transition from traditional energy sources to decarbonised solutions.

The successful candidate will develop, maintain and support EDL's Environmental Australian portfolio and ensure compliance against regulatory and company requirements. This is a hybrid work environment with the flexibility to work from home 2 days/week and is based in our head office in Brisbane.

Key Areas of Responsibility:

- Provide expert environmental direction, advice and support as required requested and/or directed to all levels within EDL, including during the construction phase of new projects.
- Participate in design reviews of new projects.
- Collaborate with the rest of the Australian team in the maintenance of the environmental management system and ISO 14001 certification.
- Develop, update and maintain environmental management plans fit for purpose to address licence requirements and specific site aspects and risks.
- Conduct environmental audits and site visits.
- Submit annual returns to environmental regulators around Australia.
- Obtain, maintain and revise necessary environmental permits and ensure accurate recording and monitoring of environmental licence compliance.
- Provide assistance and support to other EDL groups to ensure compliance with environmental management objectives (during design, construction and for ongoing operations).
- Actively ensure health and safety for yourself and others through understanding and implementing workplace health and safety standards and obligations.

Person Specific:

- Excellent interpersonal skills and an ability to liaise with external parties and fellow EDL employees and to communicate legislative/technical requirements to people in different roles.
- Effective time management and organisational skills to undertake routine and non-routine tasks without specific instruction but within allocated timeframes.
- Thrives in an environment that values and seeks continuous improvement.

- Proactive, able to identify and implement improvements and efficiencies.
- Strong attention to detail.
- Good written communication skills and an ability to use the Microsoft Office suite of software unaided.
- Positive attitude to teamwork and an enthusiasm for driving environmental awareness.
- The role is based in Brisbane, however travel on assignments, to site visits: operational and construction projects, or as dictated by the day-to-day requirements will be required.

Qualifications and Experience:

- Formal qualifications (degree level) in Environmental Science, Environmental Engineering or related discipline.
- Experience in environmental management during construction, including advising on erosion and sediment controls.
- Experience undertaking environmental audits, site inspections and developing environmental management plans and procedures.
- Experience preparing and submitting annual returns will be advantageous.
- Experience in the energy industry would be advantageous.
- Experience using SharePoint would be advantageous.

EDL is committed to creating a diverse and inclusive environment and is proud to be an equal opportunity employer.
